

Introducing Our New Product

Hemodialysis Fistula Needle Sets

Unique wing base design to minimize turbulence in the blood flow.

With back eye for high flow rate, and ultra thin needle wall to reduce the pain of the patient and allow maximum blood flow.

Available with fixed wing and wing that can rotate.

The wing with interlocking surfaces to prevent wings from slipping and maintains the needle point in the proper orientation during insertion.

Comes with industry safety protective guide.

Color coded wing for easy identification.

Pliable and highly elastic tubing to reduce the needle's movement in the patient's body.

Medical device approval number

by JAPAN PMD Act: **305AKBZX0005300**

Manufacturer has been certified

by **ISO 13485:2016** quality management system
